Summary

Founding AI Engineer and Full-stack AI Developer with 7+ years of experience taking software from an empty repository to deployment, monitoring, and ongoing operation. Builds production LLM and multi-agent systems with RAG, semantic search, provider-agnostic model orchestration, voice AI, workflow automation, metered billing, and observability. Founded Scale with Alap, co-founded and leads Zero Headache as CEO, and shipped Vibe44 and OpenUI. Uses AI coding agents to accelerate delivery while retaining ownership of architecture, testing, security, and reliability. Selected for Hyperagent's "The Founding 500" in June 2026.

Technical Skills

- **AI Agents, LLMs & Automations:** Retrieval-Augmented Generation (RAG), embeddings, vector search, semantic retrieval, multi-agent systems, agent orchestration, structured outputs, intent classification, persistent agent memory, prompt engineering, token metering, model routing and failover, AWS Bedrock, Gemini Enterprise Agent Platform, Anthropic/Claude, Gemini, OpenAI/ChatGPT, DeepSeek, Z.AI/GLM, MiniMax, MoonShot/Kimi, Qwen, OpenRouter, LangChain, Genspark, Manus, OpenClaw, Hermes Agent.
- **Languages & frontend:** TypeScript, Python, React 19, Next.js 15/16, React Native, Vite, Tailwind CSS v4, shadcn/ui, Radix UI, GSAP, Motion/Framer Motion, Zustand, Immer, ReactFlow, Fumadocs, Lenis, Lucide React, Server-Sent Events (SSE), React.lazy, Suspense, responsive and adaptive UI, accessibility, internationalization (i18n), CSS 3D transforms.
- **Backend, data & protocols:** Node.js, REST APIs, webhooks, Model Context Protocol (MCP), JSON-RPC 2.0, microservices, event-driven systems, PostgreSQL, Supabase, pgvector, Row-Level Security, Drizzle ORM, Prisma, Upstash Redis, Trigger.dev, Inngest, QStash, n8n.
- **Browser & UI systems:** requestAnimationFrame, IntersectionObserver, Clipboard API, Web Audio API, custom window management, drag/resize/snap interactions, command palettes, fuzzy search, code splitting, dark/light theming, touch gestures.
- **Voice, messaging & integrations:** Vapi, Twilio, Deepgram, ElevenLabs, Murf AI, Sent.dm, Resend, Postmark, SendGrid, Brevo, Composio, Zernio, Zapier, Cal.com, GitHub API, Notion API, CRM integrations, SMS, WhatsApp, voice AI.
- **Payments, analytics & security:** Dodo Payments, Stripe, Polar, Lemon Squeezy, Creem, PostHog, Langfuse, Mixpanel, DataFast, Umami, Plausible, Pirsch, Vemetric, Google Analytics 4, Vercel Analytics, PII redaction, WebAuthn/passkeys, RBAC, HMAC tokens, CSRF and SSRF protection, rate limiting, webhook idempotency, consent management, OWASP Top 10.
- **Delivery & AI-native engineering:** AWS Lightsail, Vercel, GitHub Actions CI/CD, Vitest, Playwright, Sentry, system design, performance and latency optimization, Claude Code, Cursor, Codex, GitHub Copilot, Google AI Studio, Antigravity, OpenCode, agent context engineering (AGENTS.md and CLAUDE.md), specification-driven development, test-driven agent loops, automated review and CI.

Projects

Scale with Alap | Interactive macOS-style Portfolio OS | Live - scalewithalap.com | [GitHub](#)

- Built a 39-file application that recreates macOS and iOS interfaces, including a custom window manager for drag, resize, edge and quadrant snapping, z-index focus, and animated minimize and restore behavior.
- Managed 30+ UI state fields in a 755-line Zustand/Immer store and code-split 13 apps with React.lazy and Suspense. Added store-driven themes, touch gestures, IntersectionObserver image loading, CSS 3D effects, and a Web Audio API interaction.
- Implemented a requestAnimationFrame dock magnification system using cosine scaling, direct DOM updates, and GPU-accelerated transforms.

Vibe44 | Marketing website & MCP for Vibe44 - The Next.js AI SaaS Starter Kit | Live - vibe44.com

- Built from scratch a serverless MCP server with JSON-RPC 2.0, 6 tools, 4 resource templates, IP rate limiting, and /llms.txt endpoints that prepare product documentation for agent and RAG ingestion.

- Automated fulfillment from Creem payment webhooks to GitHub access, single-use Cal.com booking links, Resend email, and parallel Notion/audience synchronization with idempotency guards.

Vibe44 Starter Kit | Demo website for Vibe44 – The Next.js AI SaaS Starter Kit | Live – demo.vibe44.com

- Built from scratch a 687-file, ~165,000-line Next.js 16 SaaS engine around a Universal Adapter Pattern; its LLM layer supports four providers, streaming, structured output, model switching, and a PII-redacting RAG context pipeline.
- Added 5 payment gateways, 9 consent-aware analytics providers, 4 email providers with fallback, QStash/Trigger.dev jobs, WebAuthn, HMAC impersonation, CSRF/rate-limit controls, and a 32-table PostgreSQL/RLS schema; covered by 900+ unit tests across 84 suites and 9 Playwright E2E suites.

Zero Headache – Fully managed AI front desk for local service businesses | Marketing site | YC Fall 2026 applicant | Live – zeroheadache.co

- Built from scratch a 12-channel inbound engine with 10 industry qualification playbooks and a 35+ CRM integration architecture with Google Sheets fallback.
- Built a lead-loss ROI simulator, machine-readable LLM index, compliance modules, and JSON-LD across 40+ routes in a ~17,200-line Next.js 16 and React 19 codebase.

Zero Headache – Multi-tenant Dashboard & AI Agents | In Active Development – app.zeroheadache.co

- Building from scratch a Next.js 16 platform that runs one sandboxed AI Agent per client with persistent memory and self-refining communication skills; OpenRouter provides multi-model routing and automatic failover.
- Connects channels and tools through MCP, with per-client Supabase RLS, Trigger.dev pipelines, PostHog/Langfuse observability, Dodo billing, and a LangChain operations orchestrator that requests permission before difficult actions.

OpenUI – The Local-First UI Design Platform. An Open-source Google Stitch Alternative | Live – [GitHub](https://github.com)

- Built an MIT-licensed, provider-agnostic alternative to Google Stitch for generating production UI without a cloud database, authentication layer, or subscription requirement (Next.js 16, React 19, Prisma 7, Tailwind CSS v4).

Make Me Sound – An Advanced AI-powered Communication Copilot | In Development – makemesound.xyz

- Building a parallel multi-stream engine that converts drafts into 105 tone variations with sub-second streaming; expanding across web, desktop, browser, and mobile clients.

Freecom AI – An Open-Source AI-Agents-powered eCommerce Platform | In Development – [GitHub](https://github.com)

- Building an open-source digital-download commerce platform with a self-hosted Store Manager Agent and a cloud agent swarm for SEO, content, marketing, analytics, and support with human approval controls.

Soothly AI – Autonomous Revenue Platform & 8-AI-Agents Ecosystem | In Development – [GitHub](https://github.com)

- Building an autonomous revenue operations platform running an 8-AI-agents ecosystem (Lead Gen, SEO, Partnership, Proposal, Competitor Intel, Recovery, etc.) orchestrated by a central Superagent manager.
- Runs fault-tolerant workflow functions using Inngest step execution, Supabase pgvector vector search with Row-Level Security, and 3-tier autonomy settings with human approval gates.

Experience

Founder & Full-stack AI Developer | Scale with Alap (Personal Brand) | May 2026 – Present

- Founded Scale with Alap to publish technical content and build AI products, including Vibe44, OpenUI, Make Me Sound, Freecom AI, and the Scale with Alap portfolio.
- Directs AI-assisted engineering workflows across architecture, implementation, testing, review, and CI using Claude Code, Cursor, Codex, and GitHub Copilot.

Co-founder & CEO | Zero Headache (AI-Native Service Company) | July 2026 – Present

- Leads product and engineering for a 24/7 AI lead-capture, qualification, booking, and recovery service across 12 voice and messaging channels for high-ticket local businesses.
- Defined the multi-tenant product direction, industry qualification playbooks, sub-10-second call-answer target, and outcome-based billing around booked appointments and conversations; applied to Y Combinator Fall 2026.

Co-founder & CTO | Pharmison Valentes Pharma Pvt. Ltd. (Pharmaceutical) | May 2019 – Present

- Co-founded a registered Indian pharmaceutical company and led all technology end to end – company website, internal tooling and systems, and digital operations.
- Now holds a non-executive Director and Shareholder position with no active operational role.

Independent Web & App Developer, and AI Systems Builder (Freelancer) | 2019 – 2026

- Built websites, web and mobile applications, AI systems, and automations for clients, developing hands-on experience across product engineering and delivery.

Recognition

- **"The Founding 500," Hyperagent by Airtable, 2 June 2026.** Selected as one of the Founding 500 and awarded US\$20,000 in platform AI credits. hyperagent.com/s/6YBNB4VIO26vErBhadK36w

Education

- **Bachelor of Computer Applications coursework** | JIS College of Engineering, Kalyani | 2018 – 2020 | *Left in the second year to build full time.*
- **Higher Secondary Examination, Science** | Krishnagar Collegiate School | 2018 | 77.40%
- **Secondary Examination** | Krishnagar Collegiate School | 2016 | 89.43%
